Jeziki / Languages:	Predavanja / Lectures: Angleški/English; Slovenski/Slovenian
	Vaje / Tutorial: Angleški/English; Slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Pogoj za vključitev v delo pri predmetu je opravljen izpit iz predmeta Advanced Macroeconomics, ki se izvaja v okviru magistrskih programov Denar in finance, Ekonomija in Finančna matematika, ali predmet, ki je na primerljivi ravni. Študenti morajo znati uporabljati optimizacijske metode za reševanje problemov dinamične optimizacije.	Prerequisites: It is assumed that the students have passed the exam in Advanced Macroeconomics (MSc Programme in Money and Finance, Economics and Financial Mathematics) or equivalent. Students should be able to apply optimization methods for solving dynamic optimization problems.
---	--

Vsebina: Predmet slušateljem podaja standardna orodja za analiziranje dinamičnih stohastičnih modelskih gospodarstev. Teme vključujejo teorijo dinamične stohastične rasti, investicij, modelov iskanja, frikcijs na finančnih trgih, cenovne rigidnosti, vprašanja povezana z odprtimi gospodarstvi, monetarno in fiskalno politiko. Dinamični sistemi 1. Reševanje determinističnih diferenčnih enačb	Content (Syllabus outline): This course gives standard tools for analyzing dynamic stochastic economies. It covers topics from theory of stochastic economic growth, investments, search models to analyze search theories, frictions in financial markets, price stickiness, open-economy issues, monetary and fiscal policy. - Dynamic systems 1.Deterministic difference equations and systems

Cilji in kompetence:

Spoznavanje sodobnih makroekonomskih modelov in orodij za analizo ekonomskih politik.

Modeliranje in reševanje makroekonomskih modelov. Aplikacija makroekonomskih modelov na problem ekonomske politike.

Objectives and competences:

Learn modern macroeconomic models and tools for economic policy analysis.

Modelling and solving macroeconomic models. Application of models to policy problems.

Predvideni študijski rezultati:

Cilj predmeta je pripraviti študente za samostojno raziskovljeno delo na področju makroekonomije.

Intended learning outcomes:

The aim of this course is to prepare a student for independent research in Macroeconomics.

Metode poučevanja in učenja:

Predavanja, samostojno delo na podlagi rednih domačih nalog, seminarska naloga

Learning and teaching methods:

Lectures, independent work based on regular assignments, empirical applications

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)
50 % pisni izpit,
50% seminarska naloga

Delež (v %) /

Weight (in %)

Assessment:

Type (examination, oral, coursework, project):
50 % written exam, 50% term paper
